

## Supply chain opportunities

### Working with local businesses

RES has a strong track-record of working closely with the local supply chain and maximising inward investment opportunities wherever possible.

Scلenteuch Wind Farm has the potential to deliver approximately £2.5 million in the form of jobs, employment, and the use of local services, and RES is keen to hear from local businesses who are interested in learning more about the opportunities associated with the construction and operation of this site. Some of the skills, services and materials which are likely to be required are as follows:

- » Civil engineering
- » Groundworks
- » Electrical works
- » Steel fixing
- » Plant operators
- » Labourers
- » Cleaners
- » Plant & crane hire
- » Concrete & aggregates
- » Fencers
- » Local accommodation

### Case studies

The case studies below demonstrate RES’ commitment to working with the local supply chain and maximising inward investment opportunities wherever possible on its wind farm projects.

RES’ **Freasdail Wind Farm** on the Kintyre peninsula in Argyll and Bute was commissioned in March 2017. Consisting of 11 turbines, the 22.55MW project has injected £6.34 million into the Argyll and Bute economy through working closely with the local supply chain - with £4.21 million being spent with local contractors, £1.56 million on local materials, £0.36 million on local supplies and services and £0.21 million on local accommodation.

RES’ **Glenchamber Wind Farm** near New Luce, Kirkcowan and Glenluce, was commissioned in October 2016. Consisting of 11 turbines, the 27.5 MW project delivered a considerable £8 million of inward investment and employed 45 local people during construction leading to upskilling of the local workforce.
